📍 Seattle, WA

SUMMARY

Experienced product manager and data engineer who has worked in every stage of product development. Excited about building and launching data-driven products.

EXPERIENCE

Product Manager
Tempus Labs

📅 04/2021 - Ongoing   📍 Seattle, WA

- Responsible for feature planning, prioritization, and user engagement of the data delivery platform that delivered over **50 Petabytes** of Clinical and Molecular data to pharma partners in 2021
- Conducted user interviews of consumers, worked with design, and spearheaded the implementation of data delivery features that resulted in a **20% decrease** in turn around time **per** contract fulfillment
- Created and executed 2 year product strategy of unifying the Tempus architecture to enable same day data licensing of genomic and clinical data

Data Engineer
NBC News Digital Business Intelligence

📅 07/2019 - 04/2021   📍 Seattle, WA

- Led the development, implementation and planning of data pipelines to collect and analyze affiliate e-commerce data and save the company $500K yearly in third party partnerships
- Worked with Product Owners to manage the development and release of a real-time dashboard that decreased video asset tracking lag from **10min** to **30 seconds**
- Created high throughput, reliable data pipelines to give stakeholders a swath of new user insights

Front-End Engineer
NBC News Digital Web (Rotation)

📅 01/2019 - 07/2019   📍 New York, NY

- Worked with an agile team of 12 members and QA to maintain and update sites with millions of daily visitors
- Initiated a discussion between the engineering and design team to build a better user experience using article skeletons and batch loading

Software Engineer
Comcast XD Prototype (Rotation)

📅 07/2018 - 01/2019   📍 Philadelphia, PA

- Ran and analyzed the data from monthly user tests over the Xfinity platform to increase user satisfaction by %4
- Built and prototyped the next generation of the Xfinity platform in **React**
- Built the Xfinity Home prototype to control smart devices around the house using voice

Full-Stack Engineer
Comcast Labs (Rotation)

📅 08/2017 - 07/2018   📍 Denver, Colorado

- Prototyped a smart home controlled through an **EEG** headset to allow patients with **ALS** a way to control their surroundings and regain independence
- Prototyped an Augmented Reality app using AR glasses to allow technicians to be hands free when on site and improve safety
- Used Apple's Turi Create to develop an Object Detection iOS app to allow technicians in head ends to scan and log machines and save Comcast $10M a year

PASSIONS

❤️ **Creating accessible, intuitive products that empower the user**

🤝 **Building strong, local communities and creating environments that foster creativity and individual growth**

SKILLS

Data Analysis   Agile   ETL

Batch/Streaming Data   SQL

Mentorship   UX User Research

Product Management

Roadmap Setting

EDUCATION

B.S Computer Science
The University of Texas at Austin

📅 06/2017

INVOLVEMENT

Class of 2019
Comcast CORE Technology

📅 07/2017 - 07/2019

Intensive two year rotational program focused on Software Engineering and Leadership across Comcast|NBCUniversal. Consists of one 1 year rotation followed by two 6 month rotations

Class of 2016 Fellow
Xtern

📅 05/2016 - 2016

Tech fellowship based in Indianapolis where fellows develop with local start-ups and learn how to impact their local communities
